Agenda
Final debugging of code and attempt as much as possible to fully integrate all circuits and subsystems while checking circuit diagrams for conventions. Discussion as group objectives and where to go with concepts.

AGENDA TOPIC 1			
TIME ALLOCATED	30 minutes	**LED BY:**	Ketan
DISCUSSION	Debugging code		
- Tested out the subsystems first and made sure the hardware was in fact working - Tested individually the code and tried simplifying and removing to see what features weren't working. - Try supplementing extra code that had integrated features on top of it - Use AI to assist with management and shortcomings			
CONCLUSION			
- Rewire the kit and change out some of the code.			

ACTION	ACTION TO BE TAKEN BY	DUE DATE
Review Code	Ketan	9/10
Rewire	Yanis, Ibraheem	9/10

AGENDA TOPIC 2

TIME ALLOCATED	30 mins	LED BY:	Anish

DISCUSSION	Circuit Diagrams conventions.

- Finish up on circuit diagrams and make sure it aligns with values given
- Read over the conventions booklet
- Check over the circuit diagrams and change up any block titles and symbols that were wrong
- Double check with group if everything was okay

CONCLUSION	

- Eventually circuit diagrams were all complete and individually and in unison made sense.

ACTION	ACTION TO BE TAKEN BY	DUE DATE
Anish	Do circuit diagrams	9/10
Santhosh	Read over conventions	9/10
Santhosh	Edit circuit conventions	9/10
Everyone	Final review	9/10

AGENDA TOPIC 3			
TIME ALLOCATED	30 mins	LED BY:	Ibraheem

DISCUSSION	Wire Cutting

- Make sure the subsystems was running smoothly and integrated features worked well
- Started cutting wires
- Attached wires to breadboard
- Checked once again if it was smoothly running

CONCLUSION	

- Most of the wire cutting is fully finished.

ACTION	ACTION TO BE TAKEN BY	DUE DATE
First review	Ibraheem	9/10
Cutting wires	Everyone	9/10
Final review	Yanis	9/10

AOB

Discussion of where to go further regarding integration and what else to further access in the future.
